THE OPPORTUNITY

GLP-1 patients need lab tests on a schedule. We helped pioneer testing at home.

1 in 8

U.S. adults say they are taking a GLP-1 drug right now (KFF, Nov 2025)

4–6

blood panels per patient over two years: before the first dose, at month 3, then every 6–12 months

20%+

growth in Quest’s consumer testing in 2025, to about $250M. The big labs see the demand.

Why this fits myLAB Box

Every GLP-1 patient is a **repeat customer**, whichever drug or pharmacy they use. Most get care online and need labs that come to them. We have done exactly that since 2013, as one of the first companies to offer at-home lab screening. This is the market where our head start is worth the most.

WHY NOW

The race started in 2026. Seats are being taken.

Labcorp & Quest

GLP-1 baseline and follow-up panels for doctors and consumers. Quest’s consumer site grew ~35% in 2025.

Noom

17-marker kit at $125, sold to its GLP-1 members. Uses an outside lab partner (Ash) for at-home testing.

SiPhox Health

40+ marker GLP panel at $199, painless upper-arm collection, subscription model.

Everlywell

$134 GLP-1 panel. Works with 4 of the 5 largest U.S. health plans (170M insured lives).

Investors are paying for testing tied to care

$100M

Nourish Series C (May 2026): metabolic clinic adding labs and GLP-1 care

$7M

Altro Health seed (Oct 2026): lets gyms and medspas offer GLP-1s and lab tests

~$370M

Ro’s estimated GLP-1 revenue in 2024. Platforms this size need a lab partner

Competitors are signing the telehealth and clinic partners now. Whoever is ready first gets the volume.

HOW WE WIN MARKET SHARE

Turn our pioneer head start into the GLP-1 testing leader.

What we already have

- A trusted at-home testing brand since 2013
- CLIA/CAP-certified partner labs
- A GLP-1 test on the market today ($159)
- Years of at-home test results newer players lack
- Testing-to-treatment and retail partner experience

What we lack

A deeper panel, repeat business, partners and reliable delivery. All fixable with focus and funding.

Five moves to win

1. **Fix delivery first.** Tracked kits both ways, results within 7 days, faster support. Patients on a 3-month schedule only reorder if it works.
2. **Build the best GLP-1 panel.** Add HbA1c, B12, vitamin D, ferritin, lipase, hs-CRP. Baseline and Follow-up kits, priced near Noom and Everlywell.
3. **Sell a schedule, not a kit.** Subscription that ships the next test at months 3, 6 and 12. HSA/FSA eligible.
4. **Add a clinician step.** Abnormal results get a clinician review. That makes us part of care, which partners and insurers pay for.
5. **Go where patients are.** White-label kits and an ordering link for GLP-1 telehealth, clinics, gyms and medspas.

THE ASK

Fund GLP-1 testing as its own program.

Name one owner. Give it its own budget line. Hold it to 12-month targets.

What it could be worth (first-year sales at $159 × 4 tests)

$1.6M
2,500 customers
0.025% of U.S. patients

$6.4M
10,000 customers
0.1% of U.S. patients

$15.9M
25,000 customers
0.25%, with partner deals

12-month plan

Days 0–90
Name the owner. Fix shipping and tracking. Finalize the new panel and price.

Months 3–6
Launch Baseline and Follow-up kits and the subscription. Open partner talks.

Months 6–12
Sign 2 partners. Reach 1,000+ subscribers. Publish our first GLP-1 results summary.

Planning estimates, not forecasts. Customers who stay on treatment keep buying in year two (~2 tests a year). Sources: KFF (Nov 2025); J.P. Morgan Research (~10M U.S. patients, 2025); Quest Q4 2025 earnings; Labcorp (Mar 2024); Noom, SiPhox, Choose Health, Everlywell product pages and releases (2025–26); Fierce Healthcare (Nourish, May 2026); Fitt Insider (Altro, Oct 2026); Sacra (Ro, 2024); Business Wire (Ash–Noom, Dec 2025); mylabbox.com; CB Insights.
